## Aims and Scope

*Microbial Ecology* is an international journal featuring articles of original research and mini-review articles on those areas of ecology involving microorganisms, including procaryotes, eucaryotes, and viruses. The Editors invite submissions in the areas of:

- \* significant advances in the microbiology of natural ecosystems

- \* ecological studies in medical, dental, animal, and plant microbiology
  - \* molecular biology and genetics in microbial ecology
  - \* ecological studies in applied microbiology
  - \* current methodological developments
  - \* microbial processes associated with environmental pollution
-
